

Two Transferred by U. S. Rubber Company

Bernard C. Carlson of Gardner, Ill., technical superintendent at the Joliet Arsenal's Kankakee Unit will be transferred Nov. 1 to the U. S. Rubber company's Detroit, Mich., tire plant where he will enter product development work.

Saul Moskowitz, design engineer at the Joliet Arsenal's Kankakee Unit, is also being transferred Nov. 1 to the company's Detroit plant.

The new assignments were announced by A. W. Conn, industrial relations manager at the Kankakee Unit which is operated by the company's Naugatuck Chemical division.

Carlson has been with the U. S. Rubber Company since 1942 when he started at the company-operated Pennsylvania Ordnance Plant in Williamsport, Pa., as acid laboratory superintendent. Carlson also served at other U. S. Rubber plants in Marion, Ohio; Naugatuck, Conn., and Philadelphia, Pa. He was technical superintendent at the former Kankakee Ordnance Works, a previous U. S. Rubber operation at the Joliet Arsenal during World War II. He holds a B. S. degree from Jamestown College, Jamestown, N. D. where he majored in chemistry and mathematics. He took post-graduate work in inorganic chemistry at Temple University in Philadelphia and the University of Minnesota in Minneapolis.

Carlson is editor of Chemical Reactions magazine, a publication of the Joliet chapter of the American Chemical Society. He and his wife, Mary, and their sons, John, 12, and Robert, 9, live on Elm Street in Gardner.

Moskowitz joined the company in 1952 as project engineer and has served in his present position for two years. He earned a B. S. degree in mechanical engi-
